

# Fréquence V #1 Heading North !

In 2010, we started a journey to Scandinavia.  
To map our route, we needed fellow travellers. We found them in the company known at the time as Volvo Automobiles France and we moved forward together.

Ten years later, the relationship between the Viking Classic Autoshow and Volvo Car France is as strong as .... swedish steel. Their name has been changed but their confidence in us did not. We are particularly happy and proud to announce the now official full support of our car brand for the next VCA2020: Volvo Car France will accompany us as the months will progress, through the implementation and on the D-day of the event.

Through reinforced relationships, our recent discussions have validated key organisation ideas and formalised our partnership. Now we are accelerating towards the building of the project supported by the stature and legitimacy of Volvo Car France and the undeniable dynamism of its commercial range.

In addition to the evolution of the cars design and performances, the question of motorization is a great subject we will soon chat about. By now, the success of our favourite car brand is a powerful advantage among possible partners and will strongly guarantee our credibility.

**« Let's do it ! » is the most commonly shared thought by each member of the VCA2020 crew. Already on duty, at the wheel of the ship, gazing the horizon and ready to hoist the mainsail.**
